

Karter Riggs

Artificial Intelligence Student

North Scituate, RI | krigz.karter@gmail.com | (401) 497-0576

PROFESSIONAL SUMMARY

Artificial Intelligence student and working AI intern with everyday, hands-on comfort using AI tools. Fast, independent learner — currently the sole AI-focused intern at a university institute, scoping projects with little oversight and mentoring high school students. Communicates clearly and is motivated to put AI to work for mission-driven, community-focused goals.

EXPERIENCE

AI Intern — Institute for Cybersecurity & Emerging Technologies

June 2026 – Present

Rhode Island College, Providence, RI

- Serve as the sole AI-focused intern, independently scoping and driving the lab's AI initiatives with minimal oversight.
- Guide visiting high school students through hands-on lab work, walking them through the team's tools and workflows.
- Building a GitHub repository to document lab procedures and standardize onboarding for incoming students and staff.
- Designing an AI assistant ("copilot") concept to support lab workflows and automate routine report generation.

Helper / Laborer — AD & D Welding & Boiler Works, Inc.

2019 – 2025

North Scituate, RI

- Assisted in industrial maintenance and repair operations in a hands-on team environment.
- Built strong attention to detail and reliability working efficiently in a hands-on team setting.

PROJECTS

AI News Automation (built with the OpenClaw AI agent)

- Used an agentic AI tool to build a hands-off pipeline: pulls AI/tech news from RSS feeds, summarizes it with a locally running model (Ollama), and posts to Discord on a scheduled cron job.
- Directed and configured the agent end-to-end and verified it ran reliably on its own — building familiarity with local models, automation, and wiring AI into everyday tools.

Self-Directed Learning — Local AI Models

- Acquired an NVIDIA DGX Spark to begin hands-on study of running and experimenting with local large language models.

Data Visualization (Tableau)

- Built interactive dashboards to analyze sales and profit trends across regions.
- Applied filters, maps, and calculated fields to identify patterns and insights.

Programming (Java / Python)

- Implemented sorting algorithms and built programs using object-oriented design and file input/output.

EDUCATION

Rhode Island College — Providence, RI

Expected 2027

B.S. Artificial Intelligence | GPA: 3.6 | Minors: Mathematics, Computer Science, Data Science

Community College of Rhode Island — Warwick, RI

2025

A.S. Computer Science | GPA: 3.38

University of Rhode Island — Kingston, RI

2025

Computer Science Studies | GPA: 3.78

SKILLS

Programming & Tools: Python, Java, PowerShell, Git, GitHub, VS Code, Tableau

AI & Automation: AI tools, prompt configuration, workflow automation, local LLMs (in progress)

AI Tools (daily use): Claude Code, Codex, Ollama, OpenClaw, Hermes

Concepts & Math: OOP, Data Structures, File I/O, Problem Solving, Calculus I & II, Statistics & Probability, Data Visualization
